# The Big Book 

## of

## Words for

## Dictation

## Volume 1

Copyright2022@amritavidyalayam

Dear parents,
We are happy to place this book in your hands. The wordlists would be especially useful for students who struggle to read and spell.

There are 504 boxes, and each box contains a set of twelve similar sounding words. Some words are repeated. Around 5000 words are listed in this book. Regular reading of these words would improve the reading skill of your children. This is also a sure-fire way of boosting the vocabulary of your child.

The words are arranged under different word families. For example, box no 413 has words having 'set' in them. Box no 267 and 268 have words ending in 'ify'. Reading similar sounding words would improve the decoding skills of your child and she begins to read fluently.

It is not enough to read the sentences. Your child should be taught to use these words in sentences. You can search the net for sentence examples of any word. You can make a list of suitable sentences. www.manythings.org is an excellent site. It lists out the example sentences and it also provides you with audio of these sentences. Your child can not only read the sentences but can also listen to them.

Dictionary plays an important role in improving language. Two good dictionaries in English are: Oxford Advanced Learner's Dictionary and Cambridge Advanced Learner's Dictionary. Advanced dictionaries have excellent sentence examples. Copying fifteen sentences daily from a dictionary helps children to improve their language skills. Oxford English- English- Malayalam Dictionary is an excellent dictionary.

Regular dictation is required to improve spelling. Some children are not consistent with spelling. For example, your child may write friend as frend. An hour letter, she may write friend as 'freind' or as frind. She does this because her brain is unable to properly process the spelling of the words. One has to be extremely patient while teaching struggling spellers.

Amrita Vidyalayam Team
