

**An Integrated Approach to**

**Reading, Comprehension, and Writing Skills**

**for Beginners**

Dear parents,

Is your child studying in UKG or in lower primary classes? Then this book is for you.

The objective of this book is to provide basic reading, comprehension and writing skills. We believe that the exercises in this book would help your child to improve her speaking skills as well.

**A special feature of this book is that it uses only 460 words.** All these are high frequency words. Familiarity with these high frequency words would help children speed up reading as they frequently appear in their textbooks.

We have used lots of images. Young ones learn through visualization. Whenever you teach your child, make it a point to use pictures. This improves their imagination skills.

The exercises are designed to enhance various skills required in learning English.

A brief introduction is given at the beginning of every chapter. **Answers to the exercises are given at the end of each chapter.**

As the primary caregiver, you have a great role in moulding the cognitive development of the young. You can lay a good foundation on which your child can grow. It is important to spend lots of time with a child who is below seven.

The great Greek philosopher, Aristotle, is supposed to have said, “Give me a child until seven, I will show you the man.” Like Aristotle, many share the view that the first seven years are the most important period of one’s life. It may not be true, but the fact remains that acquiring skills early gives children a head start in life.

We hope this offering will guide you in teaching the basics of English to your child.

## **Chapter 5 – Learning through picture-matching exercises**

Matching pictures with text help in understanding the concepts.

Beginning learners learn better by relating what they read to the pictures.

There are several sites which have matching exercises for beginners.

Given below are two such websites

[www.englishforeveryone.org](http://www.englishforeveryone.org)

[www.en-islcollective.com](http://www.en-islcollective.com)

Another useful site is [www.enchantedlearning.com](http://www.enchantedlearning.com) . There are plenty of material that can be downloaded free.

## **Chapter 6 Matching Exercises- Verbal**

Matching Exercises are good to make children think.

They learn concepts better with matching exercises.

There are twenty pages in this chapter and each page has six exercises.

These 120 exercises in this chapter provide enough practice for children.

It is not difficult to create matching exercises.

Create your own worksheets.

Answers to the exercises are given at the end of this chapter.

## **Chapter 7 - Learn through pictures- answering questions**

The ability to answer questions is essential to do well in exams. Some children have difficulty in understanding questions.

In this chapter, only multiple choice questions (MCQs) are asked. The questions are carefully chosen to make children think.

It is also important to ask questions which require answering in full sentences. Parents may themselves prepare suitable questions.

The answers are given at the end of the chapter.
