

Speed Tests for Students

Age 8 +

Dear Parents

There are 35 speed tests meant for students studying in class 3 to class 6.

The idea is to make your child answer questions quickly and correctly. These tests help your children to solve problems with speed and accuracy.

We can equip our children from a young age itself to take on entrance exams for professional courses and competitive exams for jobs.

These tests are excellent brain training exercises. Your child also develops the ability to have attention for details. It helps the children to tackle different kinds of problems with confidence.

It is important that you time these tests. Find out how much time your child takes to do each test. The test should be done only when the child is relaxed and has some free time. Each test should be done at a stretch.

Answers are provided at the end of every 5 tests.

We hope your children would enjoy doing these tests.
